# ODT Summative 2

## Idea Brief :

- The experience we are trying to create is a Harry Potter themed interactive table game based on the Triwizard Tournament. The player goes through three trials which includes different types of games which include themes from the original tournament to keep the story telling consistent and if they complete all three, they're crowned Triwizard Champion.
- The main inspiration is obviously from the Triwizard Tournament from Harry Potter and the Goblet of Fire ,specifically the three tasks which include the golden egg from the dragon, the maze and the gillyweed. The game maps each of these into something a player can physically interact with on a table.
